

The Waiving of Obstacles,

Acrolish of Love Theorem

This is an example of an idea or rather, project that I've been working on for years. Being an inquisitive person since a very young age, I would have to say that the idea was conceived in my single digit years. Hindsight seems to place it there. The idea was conceived of a gradual systematic questioning of "Why's" & "How's" and hardly a person or media ever provided satisfactory answers for me.

In order to spare you from boredom of describing almost half a century of events in my life I'll start at the year 2015. Up to that juncture I had read the Gideon Bible complete a couple of times, and read the KJV a couple of times and had also done general basic research on many other cultures and beliefs of the past.

The whole Abrahamic dynamic seemed so confusing while also being an important element of the present environment of current events. One particular Bible verse kept standing out to me. It was;

John 1:1 KJV <https://biblehub.com/kjv/john/1.htm>

1"In the beginning was the Word, and the Word was with God, and the Word was God."

That led me eventually to the word "love". Now I had been using computers quite a few yrs. (since DOS 3.0 was current) Also having been aware of Clif High's Web Bot and ALTA Reports, linguistics and what that involves piqued my interest in the word "love".

Short story of it, I determined that a lot of English words could actually be acronyms. Thoughts of Francis Bacon blinking through my conscious and I came up with "LOVE – Living On Virtual Energy". To take a word that (the emotion) defines so much in our environment and reduce it to a four letter word, and explaining that emotional energy is virtual, free, and endless, creates an equal plane for all to comprehend what "love" is.

It was a game changer for me. I've had this discussion with many people face to face and it's a real joy to see their faces when it dawns on them. ☺ Also I had started writing some poems and short prose to organize what I was trying to explain.

So, that's sort of what prompted me and led me to the Acrolish of Love Project.

I'll provide some images that may be helpful to follow the reasoning and logic involved with the creation of the Acrolish of Love {or} Enoch's Plan To Escape From Plato's Cave.

Supersedes Veritatem Humanae Vitae

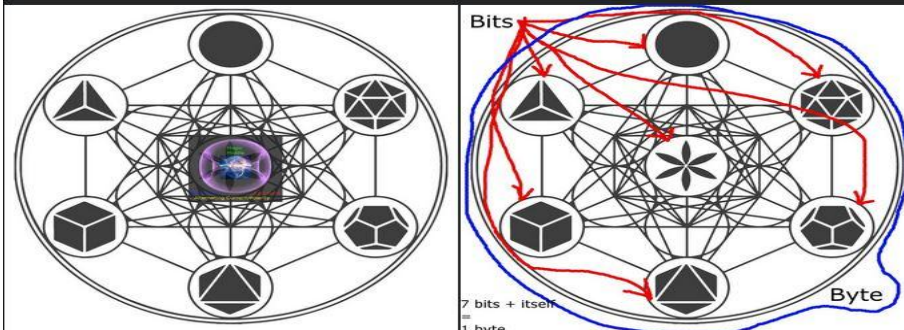

What is truth? Truth is all that is and will ever be. Hogwash you say, lies are created and run rampant within our existence. They always have and always will. Hogwash, I say. Within every lie is a grain of truth. Think about it, the conception of a lie is the truth. Why else would there exist the lie? The person responsible for the original lie knows the truth and wishes to conceal it from another for one of many reasons. Of the most popular would probably be for selfishness. There are other reasons besides selfishness, as in the case of lying to prevent the sadness of a loved one. Whatever the reason for the lie may be, when all is said and done, the lie is destructive in nature. Whereas the truth is productive. It may be inconvenient at times, however the truth will overcome the lie every time.

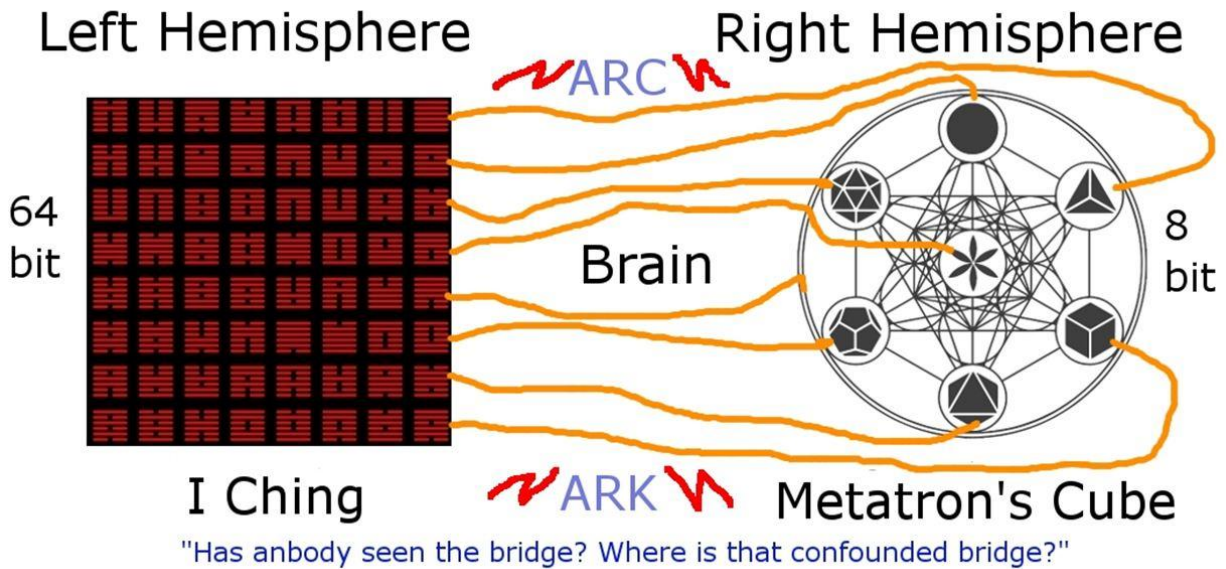

So how can we know what the truth is? The answer is quite simple really. Learn who you are. To know yourself is to know the truth. This is something that will take a lifetime for some people. Some will find their truth sooner than others. Some will not find it and become lost and weary of the journey and give up the search. That will be their choice.

Honesty supports the truth. Will you be honest with yourself and find the truth? And when you do find it, how can you be sure that it is? Look around at the effects you have on others. If one does not care about others, then that one has not found the truth.

Not to sound hippyish, new agey or weak, truth is love and understanding, which is the opposite of hate and ignorance. The Ego rules inside of the "Matrix". Love rules outside of it.

We are all bits of God.
God is a byte of all of us.
In the beginning was the Word.
The Word was with God.
The Word was God.

Abraham - Anunnaki Biometric Rendering Applied Hacked Alpha Maps
 Sarah - System Advanced Rendered Algorithmic Holographics
 Both born in Sumeria.

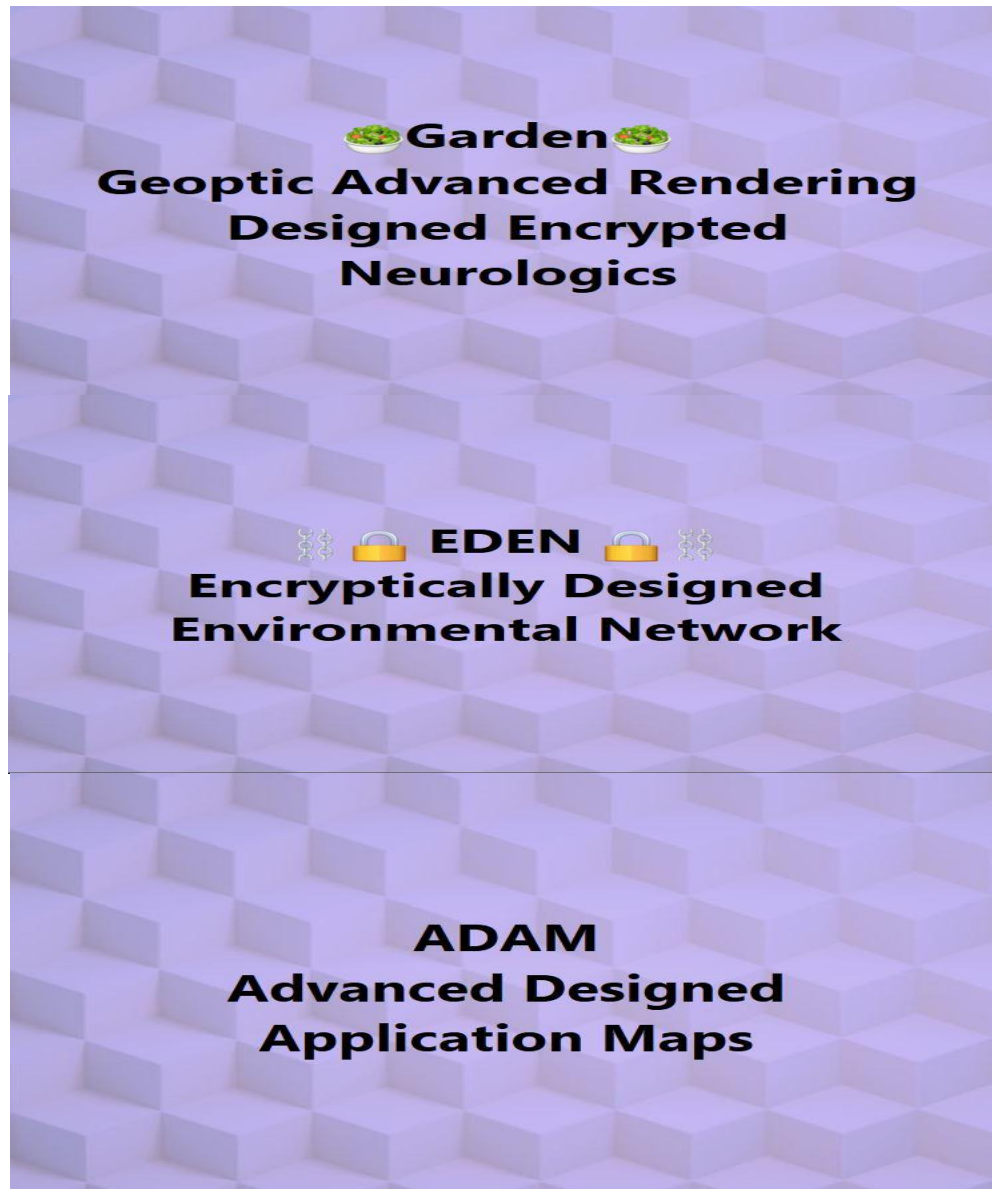

What begins to appear is an alternative technical story veiled by a very primitive accounting from a mindset of deception due to highly advanced technology found in a cave and eventually passed on to Moses.
 In other words, a historical account liberally edited to serve as factual events while shading the very real probability of a technological construct developed, existing and being hidden away from the world, for the time being.
 Keeping in mind that similar ancient stories in cultures from all over the world exist.
 Not saying that this account is 100% factual and accurate. What I'm saying is that possibly humanity has been building a corrupted world based on many different versions of corrupted historical accounts. And that the inaccuracies and corruption are accumulating in such a way that will render the present state of humanity unsustainable. Not that it is not correctable, just that the continuous, non ceasing corruptible processes, without corrective action will destroy our species sooner rather than later.

 or in other words, conscious fastened to the matterium environment for the sake of physical senses.
 All accounts of this process are built on a common foundation. All recorded from many contrasting perspectives, save a single thread flowing through each.

"Sirach 44:16, from about the same period, states that "Enoch pleased God and was translated into paradise that he may give repentance to the nations." The Greek word used here for paradise, paradeisos (παράδεισος), was derived from an ancient Persian word meaning ["enclosed garden"], and was used in the Septuagint to describe the garden of Eden."

"Enclosed garden" certainly could describe a "closed network"

Reflection

Through the mirror I see
And liken myself to a leaf on a tree.
In a start I awaken.
I ask, is this really me?

Through another mirror I peer
And liken this world deranged and most queer.
In a start I awaken.
I ask, is there really anything to fear?

Still through another mirror I look
And liken the serenity I find to a babbling brook.
In a start I awaken.
I ask, is it really sublime to be enlightened by a book?

In the mirrors I saw
And likened it to hitting a solid rock wall.
In a calm I awoke.
I know with assurance there will be peace for us all.

Today's Future

Blessed are the children,
And those who teach them.
They are the seeds to the future,
They are the roots from our past.
With care and understanding,
We will ensure these values last.

Good Bad And Unknown

By [Martin Wood](#) on Sunday, February 22, 2015 at 8:21 PM

Dwell about the nether,
afloat without a tether.

Observe the light afar,
and leave the door ajar.

Welcome is the man,
that finds his freewill,
fore he knows that he can.

He creates his world to be just and right,
because with his wisdom he has unlimited sight.

With his meticulously honed knife,
he cuts away forever from his enforced pain and his strife.

Refreshed and healed with life giving breath,
the man overcomes his selfish masters and puts them to death.

He rejoices with his family who are loved and most dear,
they know by him that they will also overcome fear.
