"Has anybody seen the bridge? Where is that confounded bridge?"

I Am Going To Write A Good Story One Day

By [Martin Wood](#) on Thursday, February 19, 2015 at 2:43 PM

Imagine if the survivor(s) of a peaceful human-like life form that had narrowly escaped the total destruction of their home planet, adrift in a universe in a spacecraft came to rest (crashed) on an alien planet. The inhabitants of the planet were fearful of the extraterrestrial event and did not have the knowledge nor wisdom to understand what was going on.

In the crash debris they found strange and unknown objects. One of the objects was a small cube (as it turned out to be) and had an embedded, coded archive of the aliens' history and bio blueprint within it. The object also worked as a rescue beacon, similar to a black box recorder in airliners of today.

The people of the planet eventually matured enough to discover some of the mysteries that the beacon contained. From there, they were able to extract enough information to eventually be able to reconstruct the universe of the aliens' home within a computer simulator. When the people of the planet accomplished this miracle feat it was considered the most sacred of acts that their world had ever known. And they called the construct Heaven and protected it with their hearts and vowed never to let another world be destroyed as what happened to the alien's world that they had witnessed from the archive.

Meh,.... too boring.... but, maybe one day I will write that story...

"In the beginning was the word, and the word was with God. And the word was God."

In the beginning were the archives, and the archives were all we had. And the archives saved you.

(547 when including spelled number revised acronyms 9/28/2019)

Notes*

*Capitalization and punctuation have significant roles in the results of processed or programmed tasks.

*Letter geometry (ie,... upper and lower case) may also play a significant role.

*Reality is just a variable amount of information that is perceived and processed by the conscious that uses another variable amount of information in order to experience, educate and comprehend itself. Ultimately and collectively creating the eternal infinity that incorporates all that is, was and will be. I AM, WE ARE, OUROBOROS comes to mind. *Your mileage may vary*

*I would also consider that what enables the entire process to continue, and varies from individual conscious to other individual consciousnesses, is a process that is called L.O.V.E. which is also a derivative of the process itself. When the concept is understood and enacted upon it becomes a variable influence that determines the entropy level of a given experience and/or environment. The more that the process and comprehension of L.O.V.E. is utilized, the more L.O.V.E. is produced that results in a lower entropy experience and/or environment. What is L.O.V.E. you may be asking? I think of it as 1) Living On Virtual Energy or 2) Logically Operating Virtual Energy 3.) Logically Optimizing Virtual Environment

Action / Reaction : Reaction / Action - code text and/or numeric format

$$\begin{array}{ccc} N & S & \text{--->} \\ & & \text{<---} \\ & & S & N \end{array}$$

^

Space/Time, Time/Space, Energy [variable]

[variable] created for adjusting long space or time, low power and short space or time, high power

This variable could represent timing, speed, power

Reversing one polarity removes [variable] without breaking

Purpose: Translating energy or action attributes to word/code

Possibly used with other non magnetic energies (gravity?)

Maybe something to consider for use as descriptor for adjustments, identification, attributes, canned cycles, sub routines etc..

Letters arranged by shape (lines, lines & radiuses, radiuses)

A E F H I K L M N T V W X Y Z

B D G J P Q R U

C O S

*I will more than likely review and make updates to the number acronyms at a future juncture.

*I feel strongly that the English language (and probably others) have been encoded into human DNA.
